SCHOOL OF MUSIC MINORS

The **Music Minor** requires only 15 credit hours and is an excellent opportunity for students in other majors to pursue their passion for music. Students will take music history and theory classes, and may choose to take private lessons, participate in ensembles, and study music technology or other elective areas.

The **Music, Media, and Enterprise Minor** is designed for students who wish to pursue careers in the recording industry, music business, or other related fields. The minor consists of 15 credit hours, most of which are required music and business classes. The remaining credit hours are electives, allowing students to explore music, business, audio engineering or communication classes.
